Our Story

In 2006, Aquant started providing more than just basic sanitary ware and bathroom fixtures in the Indian market by actively seeking out exclusive and innovative products.

We are headquartered in the bustling, vibrant & dynamic Design Capital: Mumbai. Being an Indian company, we understand your homes better.

By working with some of India's leading designers, we understand the latest trends. Our design-sense is exemplified by the consistent launching of globally trending Sanitaryware, Faucets & Showering Systems.

Our collection is comprised of contemporary products that exude luxury and combine exquisite style with state-of-the-art technology, unparalleled performance and the highest quality.

Alternative Materials

A commitment to innovation and excellence in design is the core of our business strategy. Keeping up with this commitment, we dedicate a lot of time and energy to researching new materials and the design and development of bathroom pieces that offer new possibilities to users.

When an idea is born, we begin a process of experimentation in which we play with colors, designs, and materials. By thinking about concepts from countless angles, an idea takes shape, making every washbasin a work of art.

We give you the opportunity to bring artisan craftsmanship to your space. Create a lasting impression in your bathrooms, powder rooms, and dining areas by adding washbasins in materials such as Marble, Onyx, Concrete, Wood, and Stainless Steel.

Artisan Craftsmanship

Our stone basins are produced in Bali, a spiritual destination with ancient traditions where sculpture has arguably been one of the most important forms of documenting the human experience throughout history.

At our artisanal workshops in Bali, the process of crafting each basin begins by straight-casting single blocks of natural marble or onyx. The resulting stone blocks are then hand-crafted by highly skilled artisans using primordial sculptural techniques to create truly unique wash basins, each with a distinct set of material characteristics.

Our trendiest new launch, Aquant Concrete Basins are made with the finest concrete and have an extremely high level of water tolerance and stain resistance. We have made concrete lighter and stronger, enabling us to create shapes with thin-lines and curves.

Our newly launched Inox Steel range of wash basins are made from high-quality 304-Grade Stainless Steel. The material provides the wash basins with rich colors and long-lasting shine.

Made by craftsmen using the same techniques used to make luxury yacht furniture, our Wood wash basins are made from a composite of water-proof Bamboo finished using high-quality resin.

Pedestal Wash Basins	58
----------------------	----

ONYX

Honey Onyx (Iran)

Honey Onyx imported from Iran offers a radiant and luxurious dimension to our stone basin assortment. Wash Basins made of Honey Onyx are characterized by warmth and incredible depth of color. This stone has a layered patterning that is translucent, luminous and very hard. This material can be backlit to create a dramatic effect.

Bianco Onyx (Iran)

This gorgeous White Onyx which is mined in Tuscany, Italy is one of the most luminescent available and is highly translucent. It is the rarest and most expensive natural material in our collection. Made with a beautiful onyx with a cloudy, contemplative mood, a Bianco Onyx Wash Basin offers its viewer enchanting pastel colors to calm the senses.

MARBLE

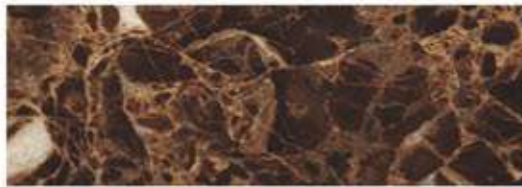

Statuario Marble (Italy)

As global trends have moved towards white/grey colored natural stones, Statuario Marble is our latest addition. Quarried in the Apuan Alps of Italy, Statuario Marble is an exclusive stone with a pure white background and dramatic, gorgeous grey veining in a striking pattern.

Carrara Marble (Italy)

Quarried in the city of Carrara located in the north of Tuscany, Italy, Carrara Marble is popular for its use in sculpture since ancient times. Found in different hues of white and gray colors, washbasins in Carrara marble are sure to add a luxe statement in your bathrooms and powder rooms.

Dark Emperador Marble (Spain)

This marble is extracted in the region of Murcia, in the south-east of Spain and has a dark to medium brown color with cobweb-like patterns of golden intersecting veins. These veins create a subtle, three-dimensional texture which gives wash basins made from Dark Emperador marble an intriguing depth in their appearance.

Nero Marquina Marble (Spain)

This stunning marble is a high-quality black marble extracted from the region of Markina in the north of Spain. Thanks to the contrast between its brilliant and intense black color and the luminosity of its white veins, wash basins made from Nero Marquina marble are absolutely marvelous.

Cream Travertine Marble (Indonesia)

This beige/cream marble is the most stable natural stone material that we use for our range. Mined near Bali in Indonesia, the softness of the beige symbolizes tranquility, which is the essence of our stone products. Due to the material's economic price point, wash basins made of Travertine Marble are perfect for projects with budget constraints.

STAINLESS STEEL

Matt Rose Gold

With the trend for special finishes currently dominating bathroom design, Rose Gold is by far our best-loved finish. Aquant's unique Matt Rose Gold tone adds just the right amount of depth and luxury to any space.

Graphite Grey

Graphite Grey is a sophisticated and modern option which offers a great contrast to natural tiles and lighter hues. Many designers and passionate homeowners have shown great interest in playing with the juxtaposition of this finish.

CONCRETE

Beige Concrete

A perfect addition to timeless bathroom & powder room designs, Beige Concrete has an earthy tone which complements rustic design themes.

Grey Concrete

Grey Concrete complements the current design thinking in the bathroom and effortlessly matches any contemporary design theme or material palette.

OTHER MATERIALS

Bamboo Wood

Made by craftsmen using the same techniques used to make luxury yacht furniture, our Wood wash basins are made from a composite of water-proof Bamboo finished using high-quality resin.

River Stone

Riverstone is by far the strongest material in our portfolio. Since Riverstone washbasins are hand-carved from naturally occurring stones, each basin has a unique shape and size. The preferred choice for projects with a natural rustic theme.

Available in two stunning finishes: Graphite Grey & Matt Rose Gold, our newly launched Inox Steel range of wash basins are made from high-quality 304-Grade Stainless Steel. The material provides the wash basins with rich colors and long-lasting shine.

The understated elegance of the material and the visual brilliance of our designs characterized by slim lines make our Stainless Steel basins strikingly beautiful additions to your decor.

Our trendiest new launch, Aquant Concrete Basins are made with the finest concrete and have an extremely high level of water tolerance and stain resistance. We have made concrete lighter and stronger, enabling us to create shapes with thin-lines and curves. Each basin is sealed with a very effective, deep penetrating sealing system to allow a real-world function.

Stone Pedestal Wash Basins

Available in 4 types of stones: Honey Onyx, Statuario Marble, Nero Marquina Marble, and Travertine Marble, stone pedestal basins can be accommodated even in tight spaces.

Sculpted works of art, these hand-made basins are created by master artisans to become the centrepieces of any powder room or dining area.

Millions of years old, Marble is one of history's more elegant creations. We source our rare Marble from some of the world's finest quarries in countries such as Italy, Spain and Indonesia.

A natural stone block with unique characteristics is transformed to create a precious wash basin which becomes the focal point of your bathroom or powder room. Every washbasin in this collection is hand-made by highly skilled artisans from Bali, giving an exclusive and unrepeatable value to each piece.

Pop-up Marble Waste Coupling

code
1023

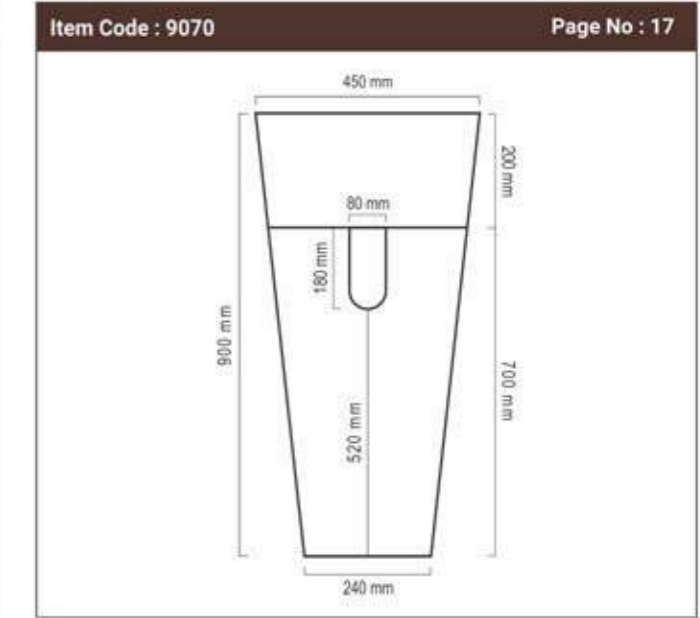

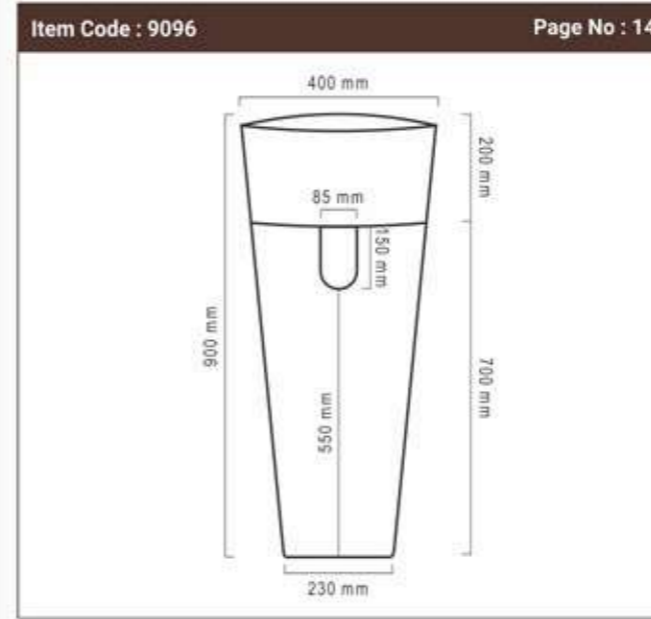

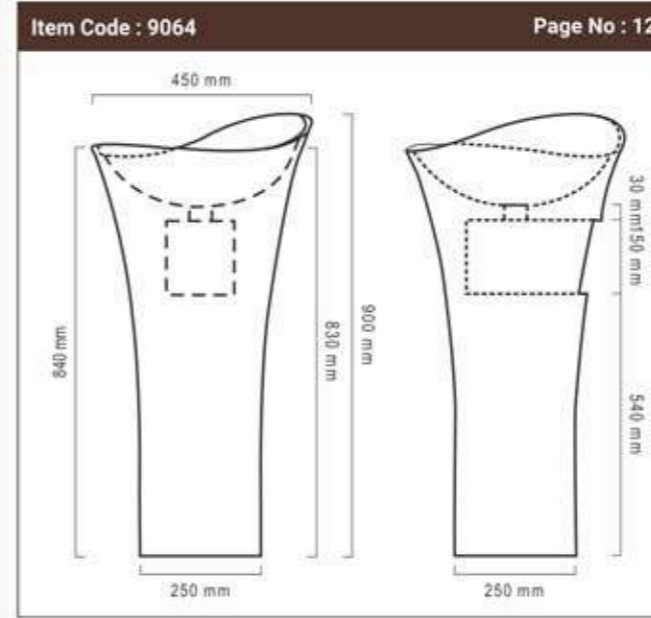

size
32 mm x 12 cm

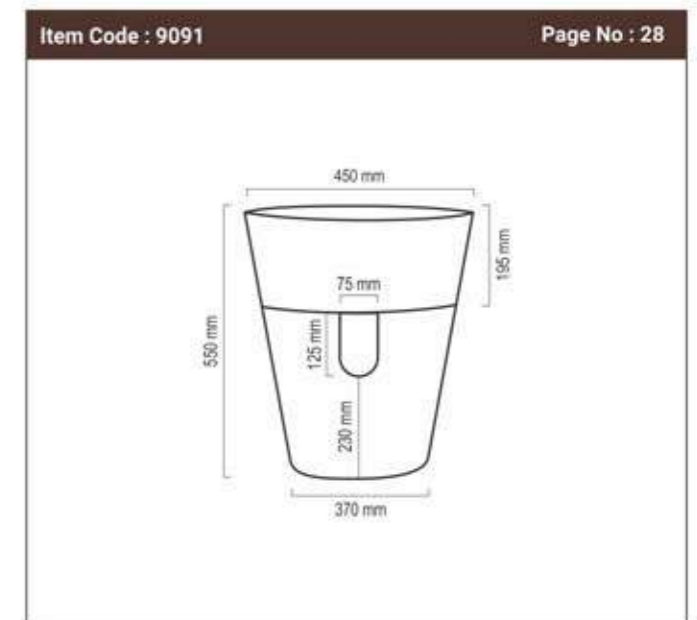

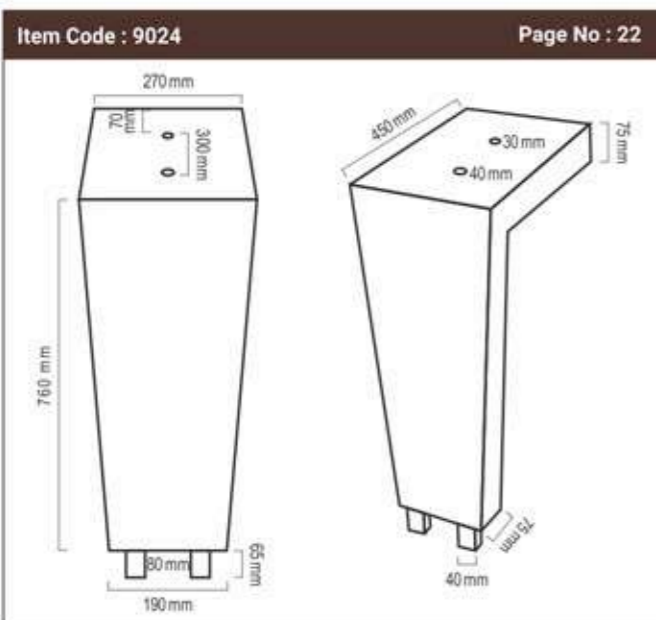

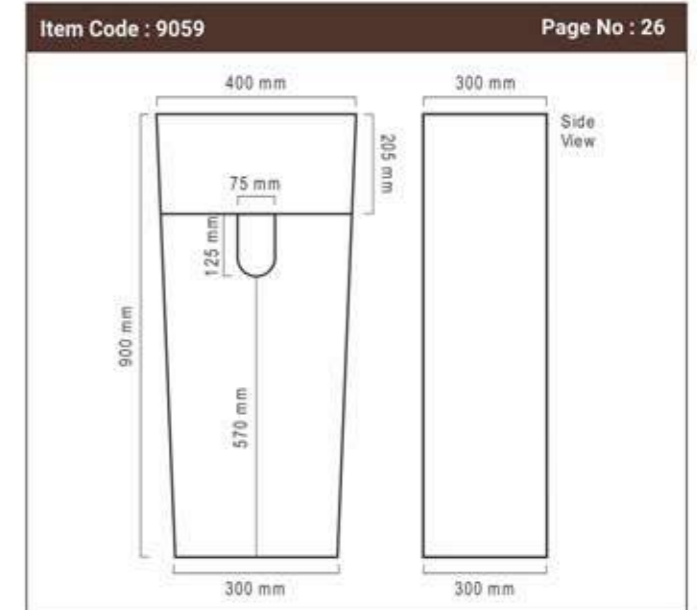

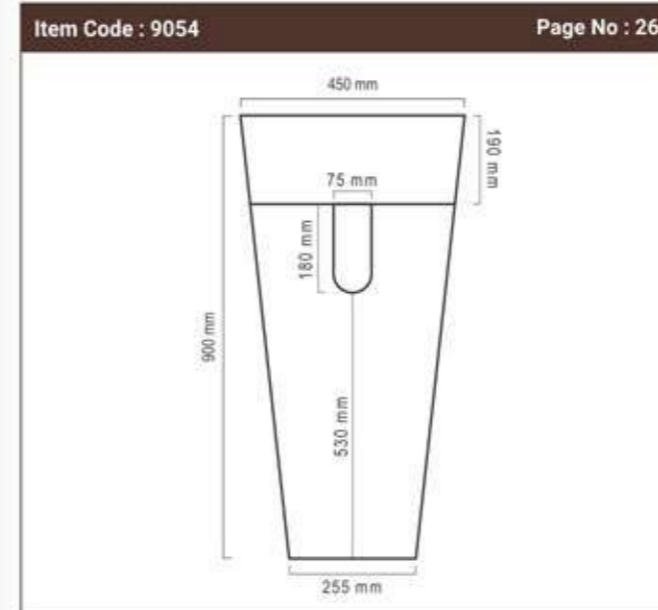

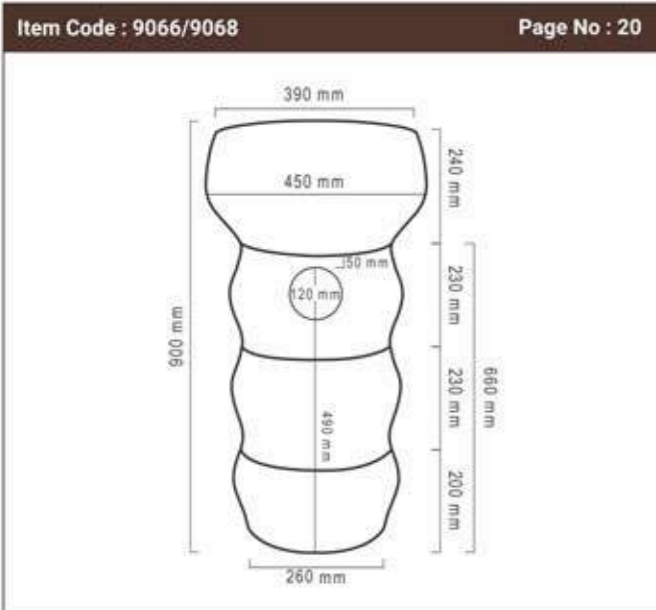

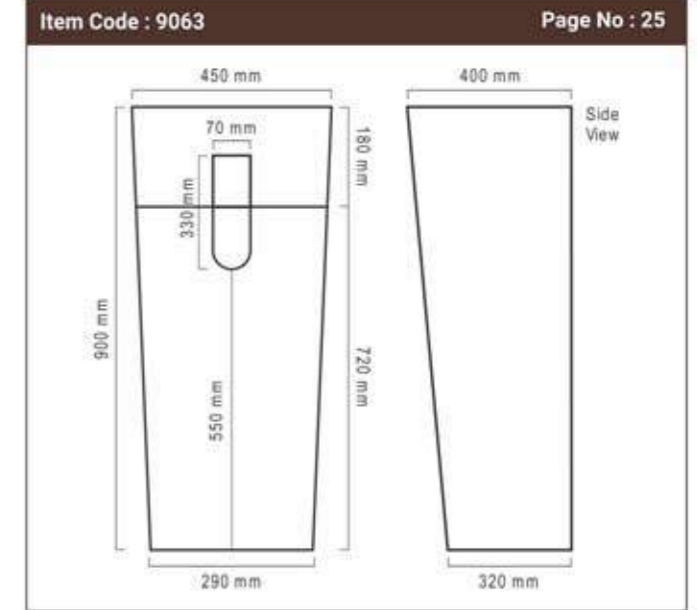

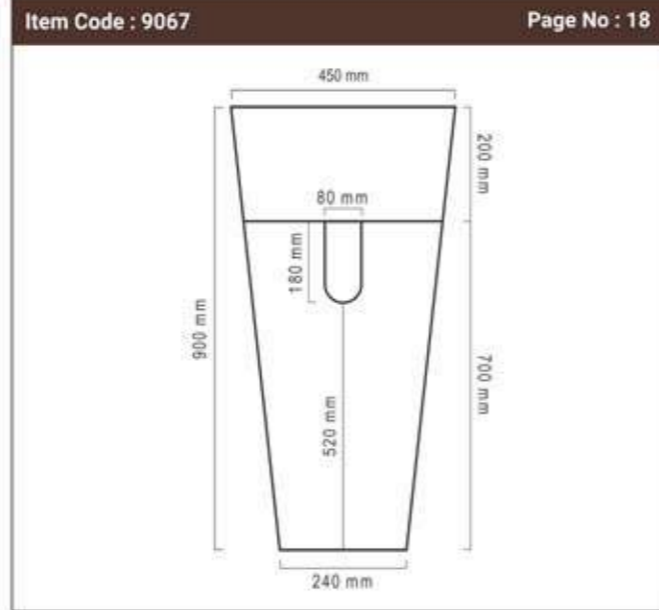

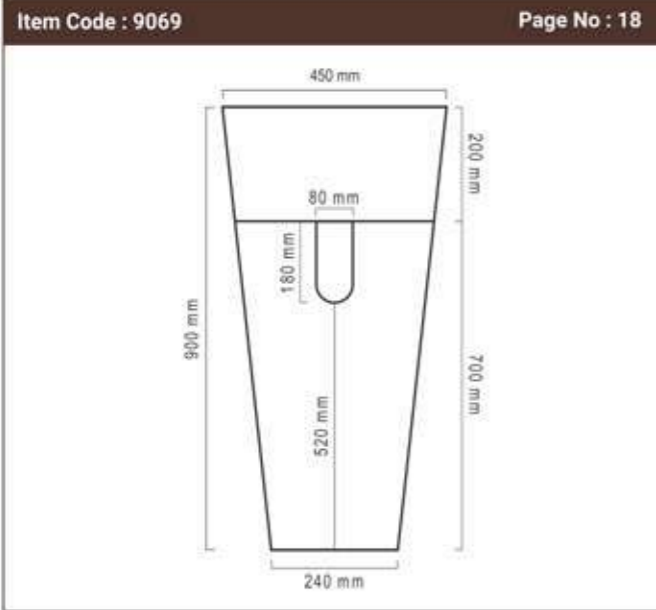

available in

- Bianco Onyx (Italy)
- Nero Marquina Marble (Spain)
- Carrara Marble (Italy)

- Travertine Marble (Indonesia)
- Dark Emperador Marble (Spain)

- Statuario Marble (Italy)
- Honey Onyx (Iran)

The various stones used have been chosen for their strong concentration of fossils and as they are purely natural product, there will also be the presence of different variations of veins, colors and shades, as well as micro cracks and small holes. This gives each piece the characteristic of being truly unique.

- Do not place the product outdoors or in direct exposure to sun light.
- The product can be cleaned with warm water, a mild soap and a clean soft cloth.
- It is not required to use any abrasive cleaning pads, wire wool or micro-fibre cloths to clean the product. Avoid a vigorous cleaning action.
- Abrasive or strong cleaning products containing ammonia, bleaches, alcohol, dyes, acids (hydrochloric, formic, phosphorus, chlorine or acetic) will be detrimental to the product finish.
- Do not use strong cleaners on Wash Basins.
- If using a spray cleaner, apply the cleaning agent onto the soft cloth, never directly spray onto the product as the cleaner may enter gaps and openings and cause damage.
- Residues of toiletries such as liquid soaps, shower gels, shampoos, hair dyes, perfumes, lipstick, after shave and nail varnish can also cause damage if not wiped up right away, this can allow the acids to react and eat away at the calcium carbonate in the stone, creating permanent markings.
- If a specialized cleaner is required, always follow the instructions provided on the cleaning product, this would include application and dosage.
- Always test the cleaning agent on an inconspicuous area before applying to the whole surface, do not allow the cleaner to remain on the product for a period of time.
- After cleaning, rinse thoroughly with clean water.
- Ensure that specialized cleaners are only applied to the specific area and do not come into contact with other materials that could be affected by it.
- We would not recommend the mixing of different cleaning agents.
- After cleaning, dry with a soft cloth.

Caring for Wood, Concrete, & Stainless-Steel Basins

- The product can be cleaned with warm water, a mild soap and a clean soft cloth.
- Do not place the product outdoors or in direct exposure to sun light.
- It is not required to use any abrasive cleaning pads, wire wool or micro-fibre cloths to clean the product. Avoid a vigorous cleaning action.
- Abrasive or strong cleaning products containing ammonia, bleaches, alcohol, dyes, acids (hydrochloric, formic, phosphorus, chlorine or acetic) will be detrimental to the product finish.
- Do not use strong cleaners on Wash Basins.
- If using a spray cleaner, apply the cleaning agent onto the soft cloth, never directly spray onto the product as the cleaner may enter gaps and openings and cause damage.
- Residues of toiletries such as liquid soaps, shower gels, shampoos, hair dyes, perfumes, lipstick, after shave and nail varnish can also cause damage, carefully clean these using the methods above.
- If a specialized cleaner is required, always follow the instructions provided on the cleaning product, this would include application and dosage.
- Always test the cleaning agent on an inconspicuous area before applying to the whole surface, do not allow the cleaner to remain on the product for a period of time.
- Stainless-Steel may discolor if left in contact with salts or acids for extended periods.
- After cleaning, rinse thoroughly with clean water.
- We would not recommend the mixing of different cleaning agents.
- After cleaning, dry with a soft cloth.

AQUANT's products used in normal residential and non-residential commercial settings are warranted to be free of defects in the material and workmanship for the period of time set forth in the warranty coverage chart as detailed below, commencing from date of sale of AQUANT's products to the original purchaser ("warranty period"):

Category	Residential Use	Non-Residential Commercial Use
Marble & Onyx Wash Basins	5 Years	2 Years
Wooden Wash Basins	5 Years	2 Years
Stainless-Steel Basins	2 Years	1 Year
Concrete Basins	2 Years	1 Year
